INDEX

Acetylcholine
  in dorsal horn neurons in laminae I–III 614, 622, 623
  in suprachiasmatic nucleus, role in circadian rhythms 649, 652
Acetylcholine receptors
  muscle development 102
  nicotinic 509–531
    cloned subunits 521, 525
    developmental correlates to genetic diversity 526
    genes 510
    in neurons 515, 525
    second messenger regulation 521
    synaptic function 511
Acetylcholinesterase
  allelic variants 45
  catalytic mechanism and structure–function relationships 35, 51
  cell biology 58
  expression in transfected cells 46
  genetics and primary structure 39
  in growth and development 73
  molecular forms 34
    derived from H and T subunits 47
  muscle development 104
  neuromuscular physiology 63
  in neurons, effect of FGF 692, 697, 699
  nonclassical functions 74
  in pathological conditions 69
Acetylcholinesterase genes
  invertebrates 39, 43
  vertebrates 40
Actin, in dendritic spines 291, 294
Activity, motor unit development 113
Adaption
  peptides in the limbic system 728
    anatomical specificity 732
    angiotensin and the response to hypovolaemia 728
    carbohydrate homeostasis 730
    c-*fos* expression 748
    chemical language 774
    multiple peptides 759
    reproductive demands 734
    satiety 732
    stress 744
  vestibulo-ocular reflex 468
Adenosine
  biochemistry and pharmacology in dorsal horn 126
  electrophysiological actions in dorsal horn 132
  mediation of dorsal horn responses to cutaneous vibratory stimulation 136
  modulation of nociception and pain 145
  neurotransmission in dorsal horn 142
Adenosine deaminase, in dorsal horn 129, 130
Adenosine receptors, in dorsal horn 130
Adenosine receptor agonists, as analgesics 148
Adenosine triphosphate
  biochemistry and pharmacology in dorsal horn 126
  electrophysiological action in dorsal horn 134
  mediation of dorsal horn responses to cutaneous vibratory stimulation 136
Adenosine triphosphate-sensitive K^+ channel 21–30
  cardiac muscle 22
  mediation of LPSP evoked by vibration 139
  neurons 27
  pancreatic β-cells 26
  physiological role 26
  properties 22
  smooth muscle 28
Age
  learning ability, terrestrial snails 16
  LTP in visual cortex 545
Aggression, limbic peptides 744
  steroid interactions 767
Aging
  cardiovascular health 379
  dendritic spine plasticity 301
  EEG 371
  event-related potentials 381
  neurobiological changes 370
  physical fitness and CNS functioning 390
Agrin 65
Aldosterone, angiotensin II interaction 767
Alzheimer's disease
  acetylcholinesterase 70
  dendritic spine plasticity 310
γ-Aminobutyric acid, in dorsal horn neurons
  in laminae I–III 610, 617, 618, 623, 636, 638
  role in 142
γ-Aminobutyric acid neurons, trophic effects of FGF 698
Amphibians 474
  interrelationships with human society 475
  skin peptides
    amphiphilic properties 490
    detection 479
    evolution 493
    physiological relevance 474
    prohormones and proteins 492
    sequence and biological similarity 483
Amygdala
  peptide interactions, sexual behaviour 741
  periaquaductal grey connections 427
Amyotrophic lateral sclerosis, acetylcholinesterase and autoantibodies 70
Anaesthesia
  2-deoxyglucose mapping in formalin-induced pain 586
  rabbit 405
Analgesia
  adenosine receptor agonists 148
  stress-induced 569
  vibration-induced, mediation by adenosine 145
Analgesic drugs, effect on expression of immediate-early genes in formalin-induced pain 590
Angiotensin II
  aldosterone interaction 767
  amphibian skin 490
  atrial natriuretic peptide interactions 761
  central–peripheral coordination 753
  c-*fos* expression following infusion 748
  noradrenaline interaction 770
  response to hypovolaemia 728
Antidepressants, cataplexy 534, 537

Anxiety, corticotropin releasing factor 745
Appetite, multiple peptidergic control 732
Arginine vasopressin
  angiotensin II-dependent release 729
  central–peripheral coordination 753
  c-*fos* expression following infusion 749
  in suprachiasmatic nucleus, role in circadian rhythms 650
Aspartate
  in dorsal horn nuclei in laminae I–III 624
  formalin-induced pain 576
Atrial natriuretic peptide
  central–peripheral coordination 753
  homeostatic control 761
Atropine, effect on theta-related cells 176
Audition, marmoset monkey 345–367
Auditory evoked potentials, aging 381
Auditory structures, marmosets
  auditory cortex 357
  auditory thalamus 356
  brain stem 352
  morphology 349
Autoimmune diseases, cholinesterases 70
Automatic behaviour, narcolepsy 534
Aversive conditioning, terrestrial snails 7, 17
  5-HT 11
Aversive response, pain perception and periaquaductal grey 428
Avoidance behaviour, terrestrial snails 2, 16
Axonal transport, acetylcholinesterase 62

Barbiturates, formalin-induced pain 586
Behaviour, terrestrial snails 2
Blood–brain barrier, peptides 755
Blood pressure
  angiotensin II 730
  brain functioning 380
Bombesins, amphibian skin 480, 488
Bradykinins, amphibian skin 480, 483
Brain stem
  auditory evoked potentials, aging 381
  auditory structures, marmosets 352
  formalin-induced pain 571
    2-deoxyglucose mapping 583, 593
    neural mechanisms 593
Brattleboro rats, circadian rhythms and vasopressin 650, 651
Butyrylcholinesterase
  allelic variants 46
  carcinomas 70
  expression in transfected cells 46
  genetics 40
  growth and development 72
  modeling 56
  molecular forms 34
  site-directed mutagenesis 58

Caeruleins, amphibian skin 480, 488
Caffeine, vibration and analgesia 146
Calbindin, in dorsal horn neurons 628
Calcitonin gene-related peptide, in dorsal horn neurons in laminae I–III 636
Calcium
  dendritic spines 294
  LTP in visual cortex 548, 550
  regulation of nicotinic receptors in neurons 521
  thixotropy in skeletal muscle 706
Calcium activated neutral protease, neuromuscular connections during development 108
Calcium channels
  muscle development 105
  neuromuscular junction development 108
Calcium currents
  dorsal horn neurons, effect of adenosine 132
  motoneurone development 95
Calspectrin, in dendritic spines 292
Cancer, cholinesterases in 70
Capsaicin, formalin-induced pain 577
Carbohydrate homeostasis, peptides in the limbic system 730
Cardiovascular disease, EEG abnormalities 380
Cardiovascular system, effect of angiotensin II 730
Cataplexy, narcolepsy 533, 534
  food elicited test 535
  pharmacology 536
Central tegmental fasciculus, antinociception 425
Cerebellar granule neuronal cells, effect of FGF on neurite outgrowth 696
Cervico-ocular reflex 438
c-*fos* expression, neuronal activation following peptide infusion 748
Chemical addressing, limbic system 726
Chemotherapy, cholinesterases in serum 71
Chloralose, rabbit anaesthesia 408
Chloride channels, muscle development 105
Cholecystokinin
  in dorsal horn neurons in laminae I–III 633
  satiety 733
Choline acetyltransferase
  in dorsal horn neurons 614, 621
  motoneurone development 95
  in neurons, effect of FGF 697, 699
Cholinergic agents, theta-related cells 172, 175, 179, 183
Cholinergic neurons, trophic effects of FGF 697, 699
Cholinesterases 31–91
  allelic variants 45
  catalytic mechanism and structure–function relationships 35, 51
  cell biology 58
  expression in transfected cells 46
  genetics and primary structures 39
  in growth and development 72
  molecular forms 34
    derived from H and T subunits 47
  neuromuscular physiology 63
  nonclassical functions 74
  pathological conditions 69
Chromaffin cells
  effect of FGF on neurite outgrowth 696
  effect of FGF on proliferation 686
Circadian rhythm
  food intake and neuropeptide Y 730
  role of neurotransmitters in suprachiasmatic nucleus 647–655
Cochlear nuclear complex, marmosets 352
Cognitive functioning, EEG and aging 380
Cognitive performance, physical fitness 391
Conditioned aversion, terrestrial snails 7, 17
Connectin 676
Contingent negative variation
  aging 382, 390
  physical fitness 391
Coping, peptides 747
Corticoid receptors in brain 765

Corticoids
  CRF interactin 767
  neuropeptide Y interaction 766
Corticotropin releasing factor
  c-*fos* expression following infusion 749
  co-existing peptides in paraventricular nucleus 762
  colocalization with vasopressin in hypothalamus 652
  corticoid interaction 767
  in dorsal horn neurons in laminae I–III 636
  noradrenaline interaction 771
  opioid interaction 764
  role in adaption 732, 745
  stress and aggression 745
  vasopressin interaction 760

Deafferentation, dendritic spine plasticity 303
Decay accelerating factor 69
Defense reaction 569
  periaquaductal grey 428
Deltorphins, amphibian skin 480, 488
Dementia, dendritic spine plasticity 310
Dendritic spine
  density 295, 299
  function 292
  localization and distribution 282
  plasticity 297
    experimentally-induced 303
    naturally occurring 300
    in pathological conditions 310
  shape 285
  structure 289
Denervation, effect on molecular forms of acetylcholinesterase 64, 66
2-Deoxyglucose mapping 566, 578
  formalin-induced pain 579
    anaesthesia 586
    brain stem 583, 590
    spinal cord 580, 590
Deprivation, dendritic spine density 303
Dermaseptin 491
Dermorphins, amphibian skin 480, 488
Development
  actin in dendritic spines 291
  cholinesterases 72
  dendritic spine density 295
  dendritic spine plasticity 300
  5-HT in terrestrial snails 17
  insect nervous system 662
  motoneurons 94
  muscle 100
  neuromuscular connections 106
  neuronal nicotinic receptors 527
  visual cortex, *in vitro* studies 543–563
Dial 408
Diet, dendritic spine plasticity 306
5,7-Dihydroxytryptamine, behavioural effects in terrestrial snails 5, 11
Dipyridamole
  analgesic effects 148
  effect on vibration-induced inhibition of nociceptive neurons 138
Dopaminergic neurons, trophic effects of FGF 698, 699
Dorsal horn
  adenosine and ATP in synaptic transmission 125–156
  laminae I–III 609
    neuropeptides 625–637
    neurotransmitters 610–625, 636
Dorsal unpaired median neuron, transmitters in 672
Down's syndrome
  dendritic spine plasticity 311
  event-related potentials 389
Drinking, angiotensin II 728
Drosophila, in neurobiological research 658
  function of nervous system 672
  structure of nervous system 659
Dynorphin
  colocalization with vasopressin in hypothalamus 652
  in dorsal horn neurons in laminae I–III 629

Ear, marmosets 349
Eating, peptidergic control 730, 732, 733
Electroencephalogram
  aging 371
    alpha slowing 373
    beta activity 375
    cardiovascular health 379
    central inhibition 377
    diffuse slow waves 375
    focal slowing 376
    physical fitness 391, 393
  formalin-induced pain 569
Electromyogram, formalin-induced pain 569
Embryo, interactions between motoneurons and muscles 93–124
Embryonic nervous system, insects 662
β-Endorphin
  appetite 732
  central–peripheral coordination 753
  formalin-induced pain 577
  reproduction, sexual behaviour and environment 737
  sexual behaviour 740, 760
  steroid interactions 767
Enkephalin
  formalin-induced pain 577
  in spinal dorsal horn neurons in laminae I–III 626, 637
Entorhinal cortex, theta-related cells
  extrinsic modulation 192
  pharmacology 179
  physiology 170
Environment
  control of reproduction 737
  dendritic spine plasticity 307
  peptides and stress 746
Environmental conditioning, terrestrial snails 4
Epilepsy, dendritic spine plasticity 311
Estradiol, dendritic spine plasticity 302
Estrogen, oxytocin interaction in brain 766
Estrogen receptors, in limbic system 765
Ethanol, dendritic spine plasticity 312
Event-related potentials, aging 381
  inhibition 384, 393
  physical fitness 392
  slowing 383
Evoked-related potentials, anaesthetized rabbit 408
Evolution
  acetylcholinesterase 66
  amphibian skin secretions 475, 493

Excitatory amino acids
in dorsal horn nuclei in laminae I–III 624
formalin-induced pain 576
Excitatory postsynaptic potentials, visual cortex slices 547
Exercise, CNS functioning 391
Exploratory behaviour, terrestrial snails 2
Eye movement
model of visual–vestibular interaction 446
neurophysiology 447
optokinetic reflex 439
predictability of the stimulus 456
saccadic 442
smooth pursuit 440
vestibulo-ocular reflex 436
visual feedback 449

Fascilin I and II 669
Feeding behaviour, terrestrial snails 2, 8, 11
Feeding and reproduction, peptidergic interactions 733
Fentanyl, rabbit anaesthesia 406
Fibroblast growth factors
effect on neuritic growth 695
effect on neuronal cell proliferation 685
effect on neuronal maturation 697
effect on neuronal survival 695
neurotrophic role *in vivo* 698
Field potentials, visual cortex slices 543
Fluoride-resistant acid phosphatase, in dorsal horn 129, 130
Food-aversion learning, terrestrial snails 8
Food elicited cataplexy test 535
Food intake
growth hormone releasing factor 732
neuropeptide Y 730
peptidergic regulation 733
Formalin pain model, spinal cord and brain stem activation 565–607
behaviour studies 567
2-deoxyglucose mapping 578
electrophysiological studies 569
immediate-early gene mapping 586
neural mechanisms 591
pharmacological and neurochemical studies 571
FOS-LI neurons, spinal cord, formalin-induced pain 587, 590
Frogs, skin secretions 473–507
Frontal cortex, contingent negative variation and aging 390
Fusimotor fibres, thixotropy 709, 712, 714, 716

Galinin
in dorsal horn neurons in laminae I–III 636
food intake 732, 733
Ganglia, insect, structure 661
Ganglion mother cells, insect nervous system 663
GAP-43, in neurons, effect of FGF 691, 697
Gastrin-releasing peptide, in dorsal horn neurons in laminae I–III 635
Gender, plasticity of dendritic spines 298
Genetics, narcolepsy 537
Geniculohypothalamic tract, neurotransmitters in 648, 649
Giant fibre pathway, insect nervous system 674
Glucocorticoid receptors in brain 765

Glutamate
activation of perifornical hypothalamic locomotor neurons 335
in dorsal horn nuclei in laminae I–III 624
formalin-induced pain 576
locomotor initiation, preoptic region 329
in suprachiasmatic nucleus, role in circadian rhythms 649
Glutaminergic neurons, trophic effects of FGF 698
Glycine, in dorsal horn neurons in laminae I–III 613, 619, 620, 623, 637
Glycolipid, anchored cholinesterases 37, 48, 69
Glycosylation of acetylcholinesterase 49
Gonadal steroids, dendritic spine plasticity 302
Grasshopper, in neurobiological research 658
function of nervous system 672
structure of nervous system 659
Growth, role of cholinesterases 72
Growth hormone releasing factor, control of appetite 732

Habenula, influence on visuomotor system 264
Habituation, terrestrial snails 3
Head–eye coordination 435–472
Haemorrhage, endocrine responses 728, 730
Hearing, marmosets 349
Heart, ATP-sensitive K^+ channel 21–27
Hibernation, 5-HT 650
Hippocampus
LTP 549
theta-related cells
extrinsic modulation 180
intrinsic oscillatory properties 194
pharmacology 171
physiology 159
Human leukocyte antigens (HLA), narcolepsy 537
5-Hydroxytryptamine
behaviour and learning in terrestrial snails 5, 11, 17
in developing insect nervous system 672
formalin-induced pain 571, 578
interaction with limbic peptides 772
in suprachiasmatic nucleus, role in circadian rhythms 649
Hypertension, brain functioning 380
Hypnagogic hallucinations, narcolepsy 534
Hypnorm 406
Hypothalamus
locomotor region, anaesthetized rat 332, 339
peptide interactions, sexual behaviour 741
Hypothyroidism, dendritic spine plasticity 312
Hypovolaemia, angiotensin and adaption 728
Hypoxia, dendritic spine plasticity 306

Idiopathic hypersomnia 534, 537
Immediate-early genes 566, 586
formalin-induced pain 587
analgesic drugs 590
brain stem 590
spinal cord 587, 591
marker for neuronal activity 748
Inferior colliculus, marmosets 355
Inflammation, GABAergic neurons in dorsal horn 612
Inheritance, narcolepsy 537
Inhibitory postsynaptic potential
theta generation 189

vibration-evoked, effect of adenosine and ATP 139
Insecticides, allelic variants of cholinesterases 45
Insects, in neurobiological research 657–682
  function of nervous system 672
  structure of nervous system 659
Insulin, effect of neuropeptide Y 731
Intellectual ability, blood pressure and EEG in the elderly 380
Interneuron 714, grasshopper, development 668, 670
Interstitial nucleus of Cajal 225
  efferent projections 226, 250, 259
  PHA-L immunoreactive neurons 226
Intrinsic oscillatory properties of limbic cortex 194
Invertebrates, in neurobiological research 657–682
Ion channels
  muscle development 104
  receptors and synaptic function 511

Joints, thixotropy in muscle 707
JUN neurons, spinal cord, formalin-induced pain 589

Kassinin 483

S-Laminin 65
Lateral geniculate nucleus — visual cortex cocultures 557
  cytoarchitectures 558
  neural connectivities 559
Lateral geniculate nucleus — visual cortex transplants 552
Laterodorsal tegmental nucleus, afferent connections 264
Learning
  dendritic spines 294
  terrestrial snails 1–19
    age-dependent changes 16
    aversive conditioning 7, 11
    behavioural repertoire 2
    5-HT 11
    long-term sensitization 4
    self-stimulation, reward 13
    short-term habituation and sensitization 3
Light, dendritic spine density 305
Limbic cortex, oscillation and synchrony 157–208
Limbic system, peptides in 723–791
  adaptive responses
    carbohydrate homeostasis 730
    hypovolaemia 728
    interaction between peptides 759
    reproductive demands 734
    satiety 732
  c-*fos* expression 748
  chemical language 774
  co-ordination between peripheral and central compartments 753
  experimental limitations 756
  modular and chemical constructs 725
  monoamine interactions 769
  paracrine release: receptor mismatch 727
  reproduction, environment and β-endorphin 737
  steroid interactions 764
  stress 744
  temporal coding 775
Locomotor activity, development 111
Locomotor initiation 323–344
  anaesthetized rat as a model 324
  perifornical/lateral hypothalamic region 332, 339
  preoptic region 329, 338
Long-term potentiation
  dendritic spine plasticity 308
  hippocampus 549
  visual cortex cocultures 559
  visual cortex *in vivo* 547
  visual cortex slices
    postnatal 543
    prenatal 551
Long-term sensitization, terrestrial snails 4
Luteinizing hormone releasing hormone, central–peripheral co-ordination 753

Magainins 491
Magnesium sulphate, rabbit anaesthesia 407
Malnutrition, dendritic spine plasticity 306
Marmoset, audition 345–367
  auditory cortex 357
  auditory thalamus 356
  brain stem auditory structures 352
  hearing range 349
  morphology of auditory structures 349
  vocal behaviour 346
Maternal responses, role of oxytocin 734
Medial geniculate body, marmosets 356
Medial prefrontal cortex
  efferent projections 240, 255
  PHA-L immunoreactive neurons 240
Medial pretectal nucleus 217
  afferent connections 263
  efferent projections 219, 249
  PHA-L immunoreactive neurons 218
Medial septum/vertical limb of the diagonal band of Broca, theta-related cells
  extrinsic modulation 190
  hippocampal synchrony 185
  pharmacology 174
  physiology 163
Membrane potential oscillations 195, 200
Memory
  dendritic spines 294
  disturbances, narcolepsy 534
Mental retardation, dendritic spine plasticity 311
N-Methyl-D-aspartate receptors
  spinal cord, formalin-induced pain 576, 592
  visual cortex, LTP 547, 549
Methylxanthines, vibration and analgesia 146
Mineralocorticoid receptors in brain 765
Monoamines, interaction with limbic peptides 769
Motivation, peptides and adaptive responses 728, 730
Motoneurone development
  cell lineage and expression of cholinergic phenotype 94
  electrical excitability 95
  functional specialization 96
  target-dependence 99
Motoneurone–muscle interactions, role in development of motor unit 93–124
Motor activity
  embryonic development 109
  postnatal development 111
Motor unit 94
  motoneurone development 94

muscle development 100
neuromuscular connections during development 106
role of activity 113
Muscle
cholinesterases 63
conditioning 711, 713
development
acetylcholine receptors and acetylcholinesterase 102
fibre type diversity 100
ion channels and passive electrical properties 104
motoneurone interactions, role in development of motor unit 93–124
thixotropy 707–721
Muscle spindles, thixotropy 708–718
Muscular activity
acetylcholinesterase 65
modification of fibre properties 117
Muscular dystrophy, acetylcholinesterase 71
Mutagenesis, acetylcholinesterase, site-directed 57
Myasthenic syndrome, acetylcholinesterase 69
Myogenesis, acetylcholinesterase 66
Myosin heavy chain isoforms, muscle development 100

Naloxone
antagonists and the role of limbic peptides 758
formalin-induced pain 577
Narcolepsy
clinical aspects 533
genetic and family studies 537
neurobiology 535
pathophysiology 535
treatment 534
Nerve growth factor, neuronal nicotinic receptors 527
Neural tube defects, acetylcholinesterase 69
Neuroblastoma cells, effect of fibroblast growth factors on proliferation 686
Neuroblasts, insect nervous system 663
Neuromedin B, in dorsal horn neurons in laminae I–III 635
Neuromeres, insect nervous system 663
Neuromuscular connections, establishment and reorganization during development 106
Neuromuscular synapse, acetylcholinesterase 63
Neuronal-bungarotoxin, effect on nicotinic receptors 525
Neurons
ATP-sensitive K^+ channels 27
generation and outgrowth in insect nervous system 663
nicotinic receptors 515
trophic activity of fibroblast growth factors 683–704
Neuropeptides, spinal dorsal horn laminae I–III 625–637
Neuropeptide FF, in dorsal horn neurons in laminae I–III 635
Neuropeptide Y
carbohydrate homeostasis 730
corticoid interactions 766
in dorsal horn neurons in laminae I–III 633
noradrenaline interactions 771
in suprachiasmatic nucleus, role in circadian rhythms 649
Neurotactin 75
Neurotensin, in dorsal horn neurons in laminae I–III 630, 637
Neurotransmitters
spinal dorsal horn laminae I–III 610–625, 635
suprachiasmatic nucleus, role in circadian rhythms 647–655
Nicotine, theta-related cells in hippocampus 172
Nicotinic receptors 509–531
cloned subunits 521, 525
developmental correlates to genetic diversity 526
genes 510
in neurons 515, 525
second messenger regulation 521
synaptic function 511
Nociception, formalin pain model 566
Nociceptive neurons, dorsal horn, effect of adenosine 138, 145
Nonassociative learning, terrestrial snails 3
Noradrenaline
cataplexy 536
formalin-induced pain 578
interaction with limbic peptides 769
5′–Nucleotidase, in dorsal horn 129, 130
Nucleotide diphosphates, regulation of ATP-sensitive K^+ channel 24
Nucleotide triphosphates, regulation of ATP-sensitive K^+ channel 23
Nucleus prepositus hypoglossi 260
Nystagmus 437, 439, 449

Octopamine, in developing insect nervous system 672
Oculomotor nucleus
efferent projections 217, 246
PHA-L immunoreactive neurons 214
Oculomotor system
model for visual–vestibular interaction 467
predictive control 456
visual feedback 449
Opioid peptides
amphibian skin 480, 488
appetite 732
formalin-induced pain 577
reproduction and environment 737
spinal dorsal horn neurons 626
steroid interactions 767
Opsin, in retinal cells, effect of FGF 698
Optic tract, PHA-L immunoreactive fibres 245
Optokinetic nystagmus 261, 439
Optokinetic reflex 439
predictive control 457
visual feedback 449, 451, 453
Orthodromic latencies, visual cortex slices 544
Oscillation in limbic cortex 157–208
Ovarian steroids, dendritic spine plasticity 302
Oxytocin
central–peripheral co-ordination 753
estrogen interaction in brain 766
pregnancy 757
role in co-ordinating maternal responses 734
sexual behaviour 736

Pain
formalin model, spinal cord and brain stem activation 565–607

behaviour studies 567
2-deoxyglucose mapping 578
electrophysiological studies 569
immediate-early gene mapping 586
neural mechanisms 591
pharmacological and neurochemical studies 571
periaquaductal grey 404, 425, 427, 428
role of adenosine 145
Pancreatic β-cells, ATP-sensitive K^+ channel 26
Paramedian pontine reticular formation 233
afferent connections 264
efferent projections 236, 253, 259
PHA-L immunoreactive neurons 235
Paraventricular nucleus, multiple peptides in 762
Paroxysmal nocturnal hemoglobinuria, acetylcholinesterase 69
Parvalbumin, GABA coexistence in dorsal horn neurons 611
Patau's syndrome, dendritic spine plasticity 311
Pattern-reversal evoked potential, aging 381, 383, 391
PD 13, 81, 723
Peptide histidine isoleucine, in suprachiasmatic nucleus 650, 652
Peptides
amphibian skin
amphiphilic properties 490
detection 479
evolution 493
physiological relevance 474
prohormones and protein 492
sequence and biological similarity 480, 483
in limbic system 723–791

pancreatic β-cells 26
physiological role 26
properties 22
smooth muscle 28
Potassium currents
dorsal horn neurons, effect of adenosine 132
motoneurone development 96
Predictive control, eye movements 456
Pregnancy, oxytocin 735, 757
Preoptic locomotor region, anaesthetized rat 329, 338
Prolactin, blood–brain barrier 755
Proprioception, muscle spindles 718
Purinergic receptors, in dorsal horn 130
Purines, biochemistry and pharmacology in dorsal horn 126
Pursuit reflex 440, 447
adaption 468
predictive behaviour 456, 460
visual feedback 449, 451, 454

Rabbit, periaquaductal grey 403–434
anaesthesia 405
aversive response 428
clinical relevance 427
connections 426
electrophysiology 425
fine structure 419
neuroanatomy 412
pain perception 425, 427, 428
stereotaxic positioning of probes 408
Ranatensins 480
Receptor mismatch, peptides in the limbic system 727
Reflex action, thixotropy 716
Reflex eye movements 436

REM sleep
  cataplexy 536
  formalin-induced pain 569
  narcolepsy 535
Reproduction
  control by physical and social environment 737
  and feeding, peptidergic interactions 733
  peptides organizing co-ordinated responses 734
Reticularis pontis oralis, theta-related cells 194
Retina,
  effect of FGF on cells in 698
  potential centrifugal innervation 213, 242, 257
Retinal velocity error, visual feedback 449
Retinohypothalamic tract, neurotransmitters 648, 649
Reward, learning, terrestrial snails 9, 13

Saccadic eye movements 259, 267, 443
Salt intake, angiotensin II 729
Satiety, peptides in the limbic system 732
Sauvagine 491
Seasonal breeding, β-endorphin 739
Self-stimulation, learning in terrestrial snails 13
Senile dementia, dendritic spine plasticity 310
Sensitization, terrestrial snails 3, 4
Sexual behaviour
  β-endorphin 739
  oxytocin 736
  POMC-derived peptide interactions 760
  terrestrial snails 2
Sexual differences, plasticity of dendritic spines 298
Short-range elastic component 705
Skeletal muscle, thixotropy in 705–721
Skin peptides, amphibian
  amphiphilic properties 490
  detection 479
  evolution 493
  physiological relevance 474
  prohormones and proteins 492
  sequence and biological similarity 483
Sleep
  formalin-induced pain 569
  narcolepsy 533, 534
  REM
    cataplexy 536
    narcolepsy 535
Smooth muscle, ATP-sensitive K^+ channels 28
Smooth pursuit eye movements 440
  predictive control 457, 460
  visual feedback 449, 454
Snails, terrestrial, learning
  age-dependency 16
  aversive conditioning 7, 11
  behavioural repertoire 2
  5-HT 11
  long-term sensitization 4
  self-stimulation, reward 13
  short-term habituation and sensitization 3
Social environment
  control of reproduction, β-endorphin 739
  peptides and stress 746
Social hierarchies 745
  5-HT — peptide interactions 773
Sodium channels, muscle development 104
Somatosensory evoked potentials, aging 383, 384
Somatostatin, in dorsal horn neurons in laminae I–III 630, 637
Speech 346
Spinal cord, formalin-induced pain 570, 576
  2-deoxyglucose mapping 580
  immediate-early genes mapping 587
  neural mechanisms 591
Spinal cord neuronal precursor cells, effect of FGF on proliferation 686
Spinal dorsal horn
  adenosine and ATP in synaptic transmission 125–156
  laminae I–III 609
    neuropeptides 625–637
    neurotransmitters 610–625, 636
Sprouting 305
Stepping, anaesthetized rat 323–344
  elicited by electrical stimulation 330, 332
  elicited by postsynaptically-active drugs 329
Steroid–peptide interactions, limbic system 764
Steroid receptors, limbic system 765
Stimulation, dendritic spine plasticity 307
Stress
  cholecystokinin 733
  induced analgesia 569
  induced eating 732
  peptides in the limbic system 744
  peptides in paraventricular nucleus 762
Substance P
  effect on dorsal horn neurons 140
  in dorsal horn neurons in laminae I–III 628, 632
  formalin-induced pain 576
  regulation of nicotinic receptors in neurons 521
Sudden infant death, dendritic spine plasticity 312
Superior olivary complex, marmosets 355
Suprachiasmatic nucleus
  neurotransmitters in, role in circadian rhythms 647–655
  rhythms in food intake, neuropeptide Y 730
Synapses

M. WOLMAN	Patterns of spread of different demyelinating processes in the myelin sheath
Y. TAKAHASHI	Gene expression in cells of the central nervous system
L. A. MARCO and R. S. JOSHI	A ketamine-induced rat model of tardive dyskinesia
C. P. LEBEL and S. C. BONDY	Oxidative damage and cerebral aging
K. WICTORIN	Anatomy and connectivity of intrastriatal striatal transplants

VOLUME 39

I. FERRER, E. SORIANO, J. A. DEL RIO, S. ALCANTARA and C. AULADELL	Cell death and removal in the cerebral cortex during development
K. V. BAEV and Y. P. SHIMANSKY	Principles of organization of neural systems controlling automatic movements in animals
J. M. BARNES and J. M. HENLEY	Molecular characteristics of excitatory amino acid receptors
J. C. SZERB and R. F. BUTTERWORTH	Effect of ammonium ions on synaptic transmission in the mammalian central nervous system
J. W. MILLER	The role of mesencephalic and thalamic arousal systems in experimental seizures
E. SIMON, R. GERSTBERGER and D. A. GRAY	Central nervous angiotensin II responsiveness in birds
T. TSUMOTO	Long-term potentiation and long-term depression in the neocortex
Y. KURACHI, R. T. TUNG, H. ITO and T. NAKAJIMA	G protein activation of cardiac muscarinic K+ channels
J. R. BLACKBURN, J. G. PFAUS and A. G. PHILLIPS	Dopamine functions in appetitive and defensive behaviours
J. PUYMIRAT	Thyroid receptors in the rat brain
C. F. ZORUMSKI and L. L. THIO	Properties of vertebrate glutamate receptors: Calcium mobilization and desensitization
D. A. MCCORMICK	Neurotransmitter actions in the thalamus and cerebral cortex and their role in neuromodulation of thalamocortical activity
M. KOSSUT	Plasticity of the barrel cortex neurons
J. S. KING, S. L. CUMMINGS and G. A. BISHOP	Peptides in cerebellar circuits
T. GOTOW	The cytoplasmic structure of the axon terminal
G. A. BISHOP and C. W. KERR	The physiological effects of peptides and serotonin on purkinje cell activity
P. A. FUCHS	Ionic currents in cochlear hair cells

G. D. ROSEN, G. F. SHERMAN and A. M. GALABURDA	Biological substrates of anatomic asymmetry
P. T. FRANCIS, M. N. PANGALOS and D. M. BOWEN	Animal and drug modelling for Alzheimer synaptic pathology
G. VAN DEN BERGHE, F. BONTEMPS, M. F. VINCENT and F. VAN DEN BERGH	The purine nucleotide cycle and its molecular defects
J. DEFELIPE and I. FARINAS	The pyramidal neuron of the cerebral cortex: Morphological and chemical characteristics of the synaptic inputs
K. FUKUSHIMA, C. R. S. KANEKO and A. F. FUCHS	The neuronal substrate of integration in the oculomotor system

VOLUME 40

C. R. GARDNER, W. R. TULLY and C. J. R. HEDGECOCK	The rapidly expanding range of neuronal benzodiazepine receptor ligands
C. BUISSERET-DELMAS and P. ANGAUT	The cerebellar olivo-corticonuclear connections in the rat
H. MEIRI, E. BANIN, M. ROLL and A. ROUSSEAU	Toxic effects of aluminium on nerve cells and synaptic transmission
P. I. PAKHOTIN, I. D. PAKHOTINA and A. B. BELOUSOV	The study of brain slices from hibernating mammals *in vitro* and some approaches to the analysis of hibernation problems *in vivo*
A NEHLIG and A. PEREIRA DE VASCONCELOS	Glucose and ketone body utilization by the brain of neonatal rats
B. B. RUZICKA and K. H. JHAMANDAS	Excitatory amino acid action on the release of brain neurotransmitters and neuromodulations: Biochemical studies
R. LENT and S. L. SCHMIDT	The ontogenesis of the forebrain commissures and the determination of brain asymmetrics
G. G. HADDAD and C. JIANG	O_2 deprivation in the central nervous system: On mechanisms of neuronal response, differential sensitivity and injury
C. HILDEBRAND, S. REMAHL, H. PERSSON and C. BJARIMAR	Myelinated nerve fibres in the CNS
M. TAKATA	Two types of inhibitory postsynaptic potentials in the hypoglossal motoneurons
E. J. WARRANT and P. D. MCINTYRE	Arthropod eye design and the physical limits to spatial resolving power
G. NISTICÒ	Communications among central nervous system, neuroendocrine and immune systems: Interleukin-2
E. HÖSLI and L. HÖSLI	Receptors for neurotransmitters on astrocytes in the mammalian central nervous system
J. S. HONG, J. F. MCGINTYL, P. H. K. LEE, C. W. XIE and C. L. MITCHELL	Relationship between hippocampal opioid peptides and seizures
S. MIHARA	Intracellular recordings from neurons of the submucous plexus
M. H. WHITNALL	Regulation of the hypothalamic corticotropin-releasing hormone neurosecretory system
T. A. LOVICK	Integrated activity of cardiovascular and pain regulatory systems: Role in adaptive behavioural responses
H. HARA, T. SUKAMOTO and K. KOGURE	Mechanism and pathogenesis of ischemia-induced neuronal damage
N. LINDEFORS, A. LINDÉN, S. BRENÉ, G. SENDVALL and H. PERSSON	CCK peptides and mRNA in the human brain
A. PERTOVAARA	Antinuciception induced by alpha-2-adrenoceptor agonists, with special emphasis on medefomidine studies
I. MERCHENTHALER, F. J. LÓPEZ and A. NEGRO-VILAR	Anatomy and physiology of central galanin-containing pathways

Printed in Great Britain by BPC Wheatons Ltd, Exeter
